PROJECTS

My secret keeper
Aug 2025 - Nov 2025

Developed My Secret Keeper, a secure and user-friendly daily diary writing application that allows users to record personal thoughts, memories, and daily experiences privately. The system includes password-protected access to ensure data security, along with features such as date-wise entries, edit and delete options, and organized diary storage. Additional features include a simple and attractive interface, search functionality for past entries, and backup support. This project highlights skills in application design, data management, and creating secure, user-centric solutions.

Online Complaint Box
Jan 2025 - Apr 2025

Designed and developed a student-friendly Online Complaint Box system that allows users to submit complaints digitally with ease. The system includes a complaint status tracking feature, enabling users to monitor progress in real time. An admin panel is provided to view, categorize, update, and resolve complaints efficiently. Additional features include secure login, organized complaint records, reduced paperwork, and faster response handling. The project improves transparency, accountability, and communication between students and authorities while demonstrating skills in web development, database management, and problem-solving.
